- Upper cabinet pass-through
- LED task lighting
- Mask or glove box dispenser
- Soap dispenser
- Stainless steel under mount sink
- Track-style monitor mount system

Center Islands & Treatment Bays

Efficiency for Storage & Utility

Center Island and Treatment Cabinets are designed to be efficient and to unify the aesthetic impression of your office, as they integrate seamlessly with the rest of our custom cabinetry options. Not only do Center Islands increase your supply storage, but they also provide visual separation and privacy in clinical areas. All clinical cabinets can be customized for optimal fit and functionality based on your team's requirements, to provide you with additional work surfaces, hand washing stations, and storage space.

Measurements and part numbers found in catalog index.

Attention to Details

Center Islands come standard with beautiful 5/8" maple (hardwood) drawer boxes, 1mm edge-banded drawer fronts, under mount full extension soft close drawer glides, concealed soft-close European-style door hinges, and:

- 96 mm bow style handles
- Stainless steel sink with faucet
- Under sink base storage cabinet
- 1, 2 or 3 drawer banks with 5 drawers each
- Stainless steel trash chute trim ring

Optional Features:

- Wilsonart™ solid surface counter top with under-mount sink

Sterilization Centers

Streamlined Design For Productivity & Safety.

Make your practice safe and efficient

▲ Toothbeary Pediatrics
in Glen Allen, Virginia

Instrument sterilization is a key functional aspect of safe dental practice. Using CDC guidelines for the instrument sterilization process, Boyd offers four standard Steri-Center cabinets to facilitate an efficient linear progression of instruments from dirty to sterile while ensuring the safety of your staff and patients. From 10' to 16'-long, Boyd standard Steri-Centers are designed for optimal fit and function within your designated space. We do offer personalized solutions to perfectly suit your space, including L-shaped and galley configurations, with the option of pass-through clean-side storage cabinetry for seamless transfer to the operato bay.

Measurements and part numbers found in catalog index.

Standard Features:

- Above and below valences on upper cabinets
- High quality faucet with sprayer and soap dispenser
- Extra wide "wrapping station"
- 2 pull out steps to help reach into upper cabinets
- Moisture resistant drawers and doors
- Soft close drawer glides
- European-style door hinges
- Frosted plexiglass windows in clean/dirty doors
- Tempered glass shelves in clean/dirty cabinets
- Trash chute insert, sharps chute and container, paper towel dispenser, and glove box dispensers
- Exhaust ventilation fan for sterile storage cabinet

Optional Features:

- Clean side pass-through to operatory bays
- Color matching "cubbies" for sundries storage
- Custom-sized tempered glass or upper cabinet shelf unit for tray or cassette storage
- Tap Master for hands-free faucet operation
- Counter mounted HVE
- Exhaust ventilation fan for sterile storage cabinet

Receive & Clean
Store dirty instruments securely in upper cabinet before processing to prevent cross-contamination.

Dry
Dry after cleaning to avoid instrument corrosion during sterilization. Try Boyd's DryCurve 1000, an automated instrument dryer to save precious drying time.

Package
Plenty of upper and lower storage allows efficient organization of packaging! Extra wide "wrapping station" gives you room to work with ease.

Sterilize
Install your choice brand of sterilizer next to conveniently located storage, so that your instruments get clean and stay clean!

Store
Blue-clean sterile storage comes equipped with ¼" clear tempered glass shelves and an exhaust fan. Instruments stored here are ready for use!

3D Printing Station

100% Quality

Boyd has developed an ergonomic, state-of-the-art 3D printing workstation to streamline doctors' work process flow. Easily print, clean and trim final products all in one place. Our latest innovation can be used across all industries to deliver essential components to patients quickly and accurately. Boyd's 3D Workstation can be designed for your current office setting and accommodates most 3D printers.

- Key Features:

• Accommodates different printers

• Ergonomic design for seamless process flow

• Internal air scrubber to eliminate fumes

• Cleaning station comprised of separate rinse and curing stations

• Mobile cart for essential and post-processing tools

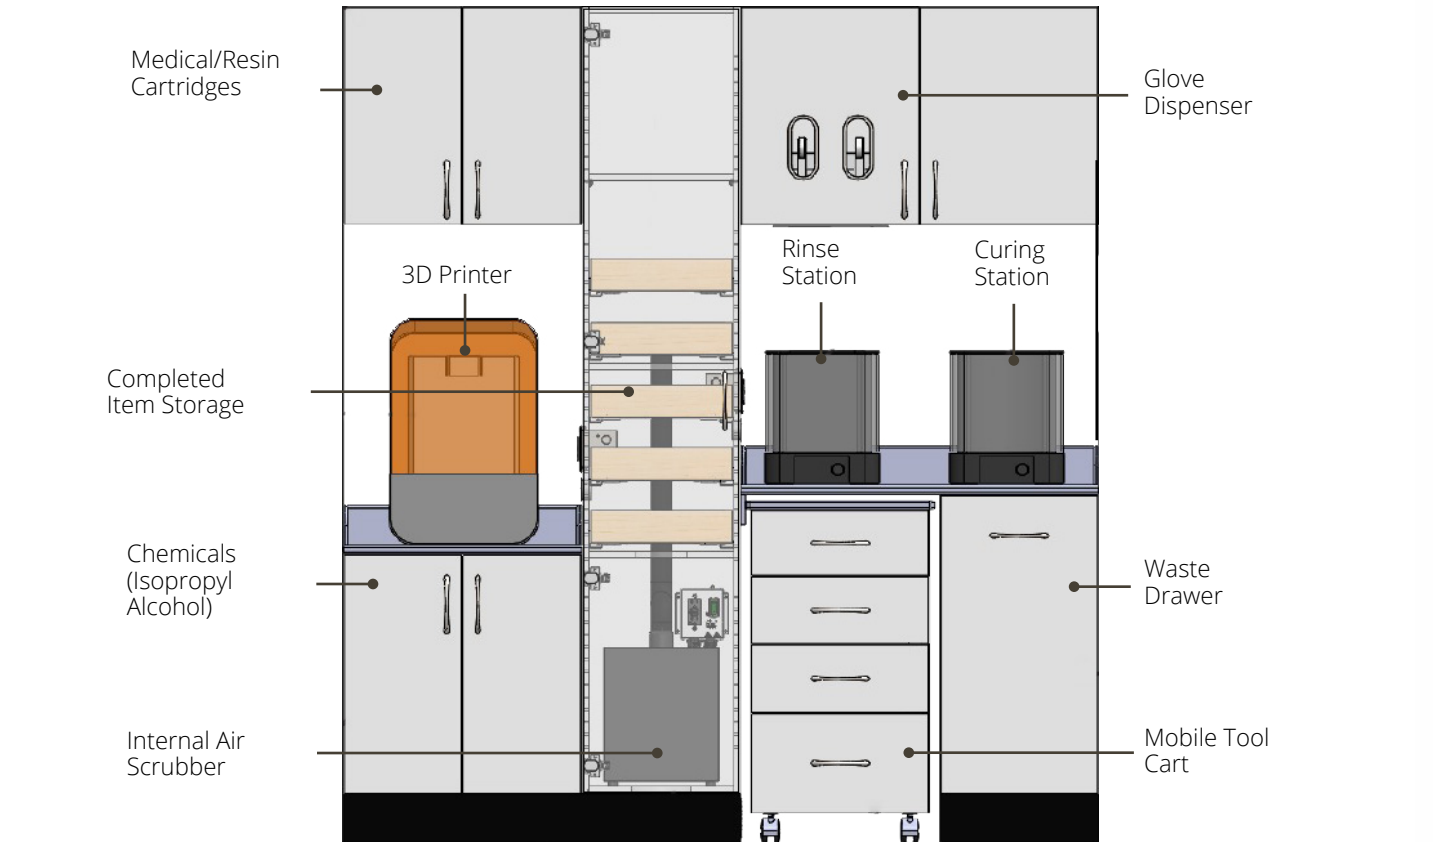

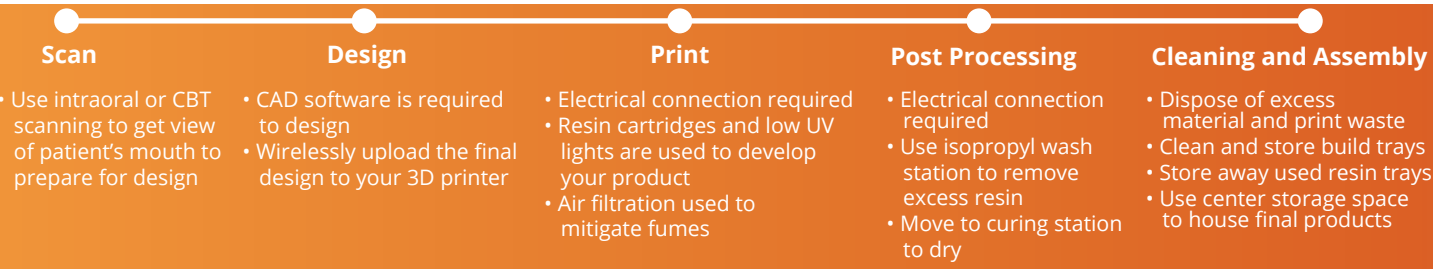

• Workstation ships and installs in modules
- Built-in storage cabinets organized for each phase of the printing process

• Waste drawer with beveled top to easily clean up small waste particles

• Pull-out tray storage for completed items

• Convenient simple/standard electric outlets on each side of center cabinet

• Built-in storage cabinets organized for each phase of the printing process

Put the latest technology in your hands

The Boyd Product Warranty

We guarantee our products with pride.

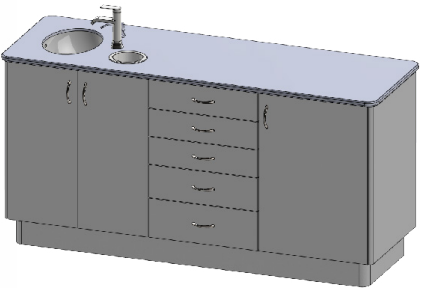

Office of Drs. Foley & Foley,
Foley Oral Surgery,
Boulder, Colorado.

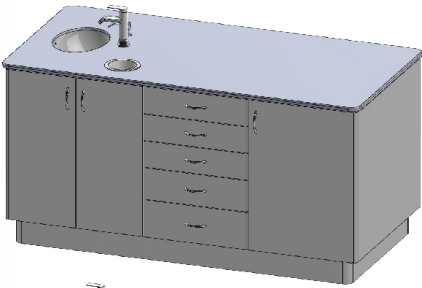

Our team of craftsmen and technicians fabricate and assemble Boyd products to the highest of workmanship standards. Their attention to detail coupled with the products durability has distinguished Boyd as the premier Orthodontic and Pediatric Dental equipment product company in the industry. Boyd Industries warrants its chair and cabinetry products against component and/or workmanship defects by offering a three year parts and one year labor warranty commencing on the invoice date of your equipment. The company reserves the right to repair or replace, at its sole discretion, any component or assembly deemed defective. The warranty will be voided if products are improperly maintained or installed or altered from its original design. Products distributed by Boyd carry the original equipment manufacturer's warranty. Boyd will not be responsible for damage to product or office facilities caused by mishandling during transport and unloading. All products must be inspected upon receipt with any damage noted with carrier for filing of damage claim.
